

The majority of the world's volcanoes are found on the **Ring of Fire** and over **80%** of the world's earthquakes take place there.

The **Ring of Fire** is the area around the edge of the huge Pacific oceanic plate where it meets with lots of other tectonic plates.

Haiti is on a **transform** plate boundary and was hit by severe earthquakes in 2010 and 2021

In 2011 The east coast of **Japan** was hit by a huge tsunami that started on a **convergent** plate boundary located on the west side of the **Ring of Fire**.
